CURVED MONITOR

Experience effortless, tear-free, low-latency, and low-latency gaming with NVIDIA G-SYNC and AMD FreeSync.
Low Frame Rate Compensation ensures every frame passes smoothly, eliminating unwanted motion blur and ghosting.

No subtle color shift will ever escape you again with the brilliance of 16.7 million colors exposed across a resplendent RGB gamut in 1080p. Its depth of 8 bits per pixel will give you 256 shades for each individual color.
Along with its anti-reflective finish, it will ensure that no ambient light gets in the way of your eyes and color sharpness that you have never experienced before.

The screen has a 1650 curvature with optimal view at 1.65 meters. allowing users to have a more immersive experience.
Its ultra-wide panoramic viewing angle maintains image clarity and consistent color for all your entertainment and gaming needs.

Two integrated speakers with 3W of power that will provide you with a clear sound without the need to fill your space with extra cables.

It provides tilt and swivel so you can easily find your ideal viewing position.
Compatible with the full range of 75x75mm VESA mounting brackets. With almost unlimited mounting capabilities it adapts to any challenge or need.

The wide range of connectivity allows computers and laptops to be easily connected to turn your monitor into a true entertainment center.
Available ports in this gaming monitor are:
1x Display Port 1.2, 1x HDMI and a 3.5 mm audio output.
