
The 144Hz high refresh rate enables you to aim at your targets faster than other gaming monitors, eliminates picture lagging, breaks through the FPS bottleneck and releases the true potential of your GPU for a fluid gaming experience.
Our Yeyian Sigurd 4000 Series Monitor will push your experience to a real-time smooth picture and give you the upper hand to fight.

Low Blue Light Technology reduces the emission of the harmful low-blue lights on a display in order to prevent eye fatigue.
Low Blue Light technology consists of a series of filters that largely prevent the radiation emitted by this light spectrum from damaging your eyesight, in addition to preserving almost all of the blue color reproduction on the screen.

We gave our Sigurd 4000 an integrally molded flexible display with revolutionary 1,500R curvature that adapts to the human eye bringing stronger visual encirclement and provides a real panoramic viewing experience.
All of this in a clean, sleek, minimal design for the perfect Gaming Monitor.

To ensure a tear free, low latency experience we have equipped the Sigurd 4000 with NVIDIA G-SYNC and AMD FreeSync. Low Frame Rate Compensation ensures every frame passes smoothly, eliminating unwanted motion blur and ghosting.

With Game Plus Mode you can preset and save specific settings for each of your games, bring the builts back pressing the programmed button and enjoy each game at its best performance.

Display more content simultaneously, thanks to a 2-screen split with and Picture-in-Picture (PIP).
Picture In Picture allows the users to multitask and overlay a secondary source to display anything you desire. Expand your workflow with our 34" 2K Sigurd 4000 Sceptre Ultrawide Gaming monitor.
